

CARL

COMPACT DESIGN

The CARL series is developed for modern restrooms where space optimisation, hygiene, and design go hand in hand.

The series consists of a compact hand dryer with an integrated HEPA filter and a touch-free sanitiser dispenser, together providing an efficient and user-friendly hygiene solution.

With its minimalist design CARL fits naturally into both small and medium-sized restrooms where every square metre matters.

The series is designed for environments with high demands for functionality, reliability, and hygiene – from offices and restaurants to hotels and public facilities.

CARL combines reliable performance with a simple, timeless aesthetic, making it easy to create an inviting and well-functioning washroom environment.

There are places where
people stay for a moment.
And where the design must
perform every single second
